

EXPLORER SERIES

The EXPLORER SERIES is a set of twenty-four tapes unique to the Research Division of the Monroe Institute. Each tape consists of actual recordings, taken during experiments with the MIAS tapes, which explored the far reaches of altered time and space. In these altered states, certain individuals learned to extend their consciousness into non-physical realms of existence. Monitored by Robert Monroe, the "Explorers" report from these non-physical environments, and communicate their perceptions. In many instances, foreign "third parties" would enter the experiments to aid in the understanding of their non-physical worlds. In the case of Miranon and many of the experiments with ROMC, a total emergence from one being into the Explorer's physical body took place, causing definitions and concepts relating to our physical beings to be drastically reexamined!

Following is a brief description of each of the tapes:

- 1) An out-of-body experience. Communication through the Explorer's vocal chords from other entities. ROMC
